ROOF WINDOWS - HATCHES - ROLLER SHUTTERS - AWNINGS - ACCESSORIES

ABOUT US

Skyfens Sp. z o.o. is an important manufacturer of roof windows in Poland and a leading brand of Arbonia consortium – a Swiss company listed on the stock exchange in Zurich, employing more than 6000 people in 10 countries. Skyfens manufactures roof windows of **SUPRO** brand and **Skylight** brand, which are based on the author's concept of PVC profile system and fitting system acknowledged by a patent clearance test and an application submitted at the European Patent Office. Our roof window manufacturing site was established in 2008 in Lublin and this city is still our seat.

150 There are up to **150** windows manufactured daily.

We have been operating for over **17** years in the roof window market.

17

WHY SKYFENS ROOF WINDOWS ARE THE PERFECT CHOICE

ENERGY EFFICIENCY:

- Energy-efficient 2 and 3-glazing package
- Pack of four special gaskets
- Warm frame TGI Spacer

QUALITY:

- **Skyfens** windows are made of PVC, reinforced with steel cores.
- The **SUPROALU** line has an aluminum profile
- Micro drains

ERGONOMY:

- Raised pivot as standard or central axis of rotation for **SUPROALU** lines
- Two micro-tilt positions in the handle
- Gas cylinders
- Three positions for safely locking the window in place

SIMPLE INSTALLATION:

- Window installation in all types of roofing materials
- Use of special mounting brackets
- Specially designed hinges
- Easy installation of flashings

NEW - LAMINATED SAFETY GLASS VSG

2025

Laminated glass (VSG) consists of two panes of glass that are bonded together with a highly tensile and elastic separating layer made of polyvinyl butyral (**PVB**) film.

What does the abbreviation 'VSG' mean?

The term **VSG**, commonly used in Europe and worldwide, is an abbreviation of the German term "**Verbund Sicherheits Glas**", which means '**safety laminated glass**'.

Unlike tempered glass, **VSG** does not shatter into small pieces when damaged, but retains its original shape. If the permissible load is exceeded by impact or pressure, the glass breaks, but the broken pieces of glass remain attached to the intact **PVB** film. This prevents the risk of injury and keeps the glazed area closed.

✓ Advantages of VSG glass:

- increased mechanical strength while maintaining its shape after breaking
- no falling glass fragments when the pane is broken
- VSG panes are one of the safest types of glass available on the market today
- available in a frosted glass version that hides what is behind it

2025

Roof windows

SKYLIGHT ECONOMIC

New 2025 - economical variant in the best possible price, with new build of the frame and sash.

Skylight Economic roof windows stand out above all our products for having the greatest balance between price and quality. Its parameters are sufficient enough for domestic use, but it also incorporates the other pluses of the Skylight range.

SKYLIGHT ECONOMIC

Energy efficiency	<ul style="list-style-type: none"> 2-pane package straight classic PVC profile U_w=1,4 W/m²K
Material	<ul style="list-style-type: none"> lead-free PVC steel reinforcement

1,4 W/m²K	1,1 W/m²K	30 dB	class No. 3	class No. E1050	class No. C3

- **The new improved profile** combined with a 2-glazed package guarantees a balanced balance of heat gain and loss. U_w coefficient of 1.4 W/m²K.
- **Long-lasting durability.** Aesthetically pleasing, age-resistant, insensitive to moisture and temperature changes PVC, ideal for use in any room of your home.
- **The raised 3/4 pivot** increases visibility from the window and free access.
- **Design.** The window with a simple classic profile will perfectly illuminate interiors of any style.
- **The proprietary, patented fitting system** guarantees full stability of the sash in both the tilt, open and pivot functions while maintaining absolute safety.
- **The system of four gaskets** resistant to low temperatures ensures perfect tightness of the Skylight roof window.
- **Can be installed on roofs** with pitches from **15 to 70 degrees**.
- **Easier replacement of the** glazing unit due to "frontal" installation
- **Using a spring from Skylight** with a **Supro** frame - a balance between price and quality.
- **The external reinforcement of the roof window** protects the hardware from the weather and improves the sealing of the frame-sash connection.
- **Shock-absorbing fitting** does not require any adjustment.
- **No special maintenance is required.** Care is limited to window cleaning.
- **Convenient position for washing** the window - turning the window up to 120 degrees .

Standard window dimensions:

5/7	5/9	5/11	6/9	6/11	6/14	7/9	7/11	7/14	7/16	9/11	9/14	11/11	11/14

Handle	<ul style="list-style-type: none"> two passive ventilation positions

Technical data:

Coefficient U_w	Coefficient U_g	Sound insulation	Air permeability	Watertightness class	Wind load resistance
1,4 W/m ² K	0,5 W/m ² K	31 dB	class 3	class E1200	class C5

- SkylightPLUS Loft Termo Roof Windows** – Equipped with a double-glazed package and a warm frame, achieving excellent thermal insulation parameters with a U-value of 1,4 W/m²K. This is an ideal solution for those seeking a balance between cost and energy efficiency in both heated and unheated spaces.
- Innovative Hinge.** Enhanced safety and functionality thanks to the new hinge, which not only increases durability but also allows for smooth adjustment of the window sash, ensuring a perfect fit.
- Additional Dimension Options** – We have introduced new, large sizes for roof windows: 6/11 and 7/11, which meet the needs of projects requiring larger installation solutions and provide additional light space.
- Accessibility and Ergonomics** – The roof windows can be opened to the right or left, facilitating roof access. Side opening with a lock ensures that the sash remains open at a 90-degree angle.
- Innovative Opening Mechanisms** – For sizes 5/7 and 5/9, a casement mechanism is used, which facilitates manual opening and closing operations. In larger sizes 6/9, 6/11, 7/9, and 7/11, double gas struts with a damping function are installed, ensuring smoothness and safety in use.
- Optimal Protection Against External Conditions** thanks to four seals resistant to low temperatures, which provide maximum tightness of the roof hatch.
- Aesthetics and Easy Maintenance** – The roof window has a classic design that fits well with various interior styles and requires minimal maintenance, limited to occasional washing.
- Passive Ventilation** – The handle allows the roof hatch to be cracked open in two positions, enabling effective and adjustable ventilation.
- Installation on Various Roof Slopes and Coverings** – The roof window can be installed on roofs with a slope of 15 to 70 degrees and on any type of roof covering, offering wide compatibility and flexibility in adapting to various roof constructions.

Standard dimensions of the hatches:

5/7*	5/9*	6/9**	6/11**	7/9**	7/11**
550x780	550x980	660x980	660x1180	780x980	780x1180

* dimensions of egress hatches with hinge installed

** dimensions of egress hatches with fitted gas spring assisted opening

- hinge (5/x)

- gas actuator (6/x and 7/x)

SUPRO LOFT TRIPLE

Supro Loft Triple roof hatches provide good thermal insulation thanks to their triple glazing ($U_w 1,2 \text{ W/m}^2\text{K}$). They are also available in large sizes for better interior lighting. New adjustable hinges and gas struts make installation easier and more comfortable.

SUPRO LOFT TRIPLE

Energy efficiency	<ul style="list-style-type: none"> 3-glazed package simple classic profile parameter $U_w=1,2 \text{ W/m}^2\text{K}$
Material	<ul style="list-style-type: none"> lead-free PVC steel reinforcements
Opening	<ul style="list-style-type: none"> manual to the side sizes 6/X and 7/X with gas spring actuators can be opened to the right or to the left side of the roof
Handle	<ul style="list-style-type: none"> two passive ventilation positions

Technical data:

Coefficient U_w	Coefficient U_g	Sound insulation	Air permeability	Watertightness class	Wind load resistance
1,2 W/m²K	0,5 W/m² K	32 dB	class 4	class E1200	class C4

- **SUPRO Loft Triple Roof Hatch** - with a triple glazing package achieving a thermal transmittance coefficient (U_w) of 1,2 W/m²K. It is an ideal choice for both heated and unheated rooms, offering good thermal insulation.
- **Innovative Hinge.** Enhanced safety and functionality thanks to the new hinge, which not only increases durability but also allows for smooth adjustment of the window sash, ensuring a perfect fit.
- **Additional Dimension Options** – We have introduced new, large sizes for roof windows: 6/11 and 7/11, which meet the needs of projects requiring larger installation solutions and provide additional light space.
- **Accessibility and Ergonomics** – The roof windows can be opened to the right or left, facilitating roof access. Side opening with a lock ensures that the sash remains open at a 90-degree angle.
- **Innovative Opening Mechanisms** – For sizes 5/7 and 5/9, a casement mechanism is used, which facilitates manual opening and closing operations. In larger sizes 6/9, 6/11, 7/9, and 7/11, double gas struts with a damping function are installed, ensuring smoothness and safety in use.
- **Optimal Protection Against External Conditions** thanks to four seals resistant to low temperatures, which provide maximum tightness of the roof hatch.
- **Aesthetics and Easy Maintenance** – The roof window has a classic design that fits well with various interior styles and requires minimal maintenance, limited to occasional washing.
- **Passive Ventilation** – The handle allows the roof hatch to be cracked open in two positions, enabling effective and adjustable ventilation.
- **Installation on Various Roof Slopes and Coverings** – The roof window can be installed on roofs with a slope of 15 to 70 degrees and on any type of roof covering, offering wide compatibility and flexibility in adapting to various roof constructions.

Standard dimensions of the hatches:

5/7*	5/9*	6/9**	6/11**	7/9**	7/11**
550x780	550x980	660x980	660x1180	780x980	780x1180

** dimensions of egress hatches with fitted gas spring assisted opening

- hinge (5/x)

- gas actuator (6/x and 7/x)

Roof hatches

SUPRO LOFT TRIPLE **TERMO**

Supro Loft Triple Termo roof hatches offer excellent thermal insulation thanks to a triple glazing package with a warm frame ($U_w 1,1 \text{ W/m}^2\text{K}$). Ideal for large roof openings, they provide a balance between cost and energy efficiency.

SUPRO LOFT TRIPLE TERMO

Energy efficiency	<ul style="list-style-type: none"> 3-glazed package with TGI Spacer warm frame simple classic profile parameter $U_w=1,1 \text{ W/m}^2\text{K}$
Material	<ul style="list-style-type: none"> Lead-free PVC steel reinforcements
Opening	<ul style="list-style-type: none"> manual to the side sizes 6/X and 7/X with gas spring actuators can be opened to the right or to the left side of the roof
Handle	<ul style="list-style-type: none"> two passive ventilation positions

Technical data:

Coefficient U_w	Coefficient U_g	Sound insulation	Air permeability	Watertightness class	Wind load resistance
1,1 W/m²K	0,5 W/m²K	32 dB	class 4	class E1200	class C4

- SUPRO Roof Hatches** with a triple-glazed package and a warm TGI Spacer frame effectively reduce the heat transfer coefficient (U_w) to 1,1 W/m²K. They are ideal for both heated and unheated spaces due to their excellent thermal insulation properties.
- Innovative Hinge.** Enhanced safety and functionality thanks to the new hinge, which not only increases durability but also allows for smooth adjustment of the window sash, ensuring a perfect fit.
- Additional Dimension Options** – We have introduced new, large sizes for roof windows: 6/11 and 7/11, which meet the needs of projects requiring larger installation solutions and provide additional light space.

SEALING FLANGES

Sealing flanges made of aluminium sheet with permanently protected polyester paints.

Flange types:

- **F** - flange for **corrugated** roofing (up to a wave height of **3.5 cm**)
- **P** - flange for **flat** roofing
- **M** - modular
 - **MF** - modular for **corrugated** roofing*
 - **MP** - modular for **flat** roofing*
- **K** - elbow flange (for connecting a roof window with a facade window), available also in a modular version.
- Scaled flange
- Flange for **flat roofing + box** (wood + styrofoam)
- Flange for **panel sheet**
- Flange for **renovation** (to replace an old window with select Skyfens windows)

*Special flanges enable the installation of windows side by side or one above another.

Modular corrugated "F" and flat "P" flange

Flange for flat roofing

RENOVI - roof window + renovation flange

RENOVI roof windows complete with renovation flange of an aesthetically pleasing, simple profile geometry fit in with both modern and traditional construction. Windows made of PVC do not require any additional maintenance. The window's raised pivot axis and the handle fixed at the bottom of the window, guarantee ease of use and more space in the room.

The main advantage of renovation windows is the ability to adjust the depth of their installation in the roof slope. This allows us to build a new window on the existing interior wall of the room without disturbing it.

Hence the name - "renovation window".

This has been achieved thanks to the special design of the elements that fasten the frame to the roof slope beams, as well as the special design of the sealing collar, consisting of an upper part tied to the frame and a lower part laying on the roof slope.

Possible windows for use as a renovation set:

- **Skylight Economic**
- **Skylight Plus Termo**
- **Supro Triple**
- **Supro Triple Termo**

COLOURS

Individualism and aesthetics. The appearance of the Skyfens products combines functionality and beauty. Roof window profiles of the **SUPRO** and **Skylight** lines are made in classic white color. The colors of the cladding and sealing flanges are available in two colors **RAL7043 (anthracite)** and **RAL8019 (brown)**.

Color of the window frame

RAL 8019

Examples available upon request:

RAL 7016

RAL 9005

RAL 3009

RAL 9010

Opening handle (optionally with a lock)

SUPRO and **SKYLIGHT** roof windows are fitted with the classic white handle. On special request, we can use a handle with a safety button, which protects the window from being opened, for example by children. A cut-out is provided in each handle slot, allowing the window to be unsealed and the room to be effectively aired. and effective ventilation of the room. **SUPRO** windows have two positions of unsealing, and **SKYLIGHT** have one.

White

SUPRO handle slot

Skylight handle slots

PVC roof windows have three fixed opening positions that guarantee the stability of the sash and safe use in these positions.

Window ventilators

New, warm windows allow not only for heating savings but they also make staying at home more comfortable. This is why proper ventilation is now even more important because it enables eliminating dampness from rooms. In some situations, regular airing may be not enough. A good solution here are windows with integrated intake ventilators.

ACCESSORIES

Electric actuators

They guarantee comfortable and automatic window operation. This is a perfect solution for windows mounted in locations with difficult access. A rain sensor which closes the window automatically when rain is detected. It is also possible to equip the window with a wind sensor which closes the window automatically when strong wind is detected. A simple and flexible solution preventing the need for the manual window operation..

Telescopic stick

Telescopic stick for roof windows allows easy and simple control of a window installed at a high height. Available in **160cm**, **180cm** and **200cm versions**.

Water permeable membrane SkyDAMP

Made out of a roofing membrane of approximately 150 g/m², three-layer, open diffusion, with excellent vapour permeability. Durable and resistant to aging. Suitable for use on fully boarded roofs.

2025

Valves for window packages used in mountainous areas (>650 m above sea level)

Standard insulating glass units perform well at heights close to where they are manufactured. At high altitudes (> 650 m above sea level), reduced atmospheric pressure can cause significant overpressure in the glass, leading to reduced durability of the glass seal, bulging of the glass and even cracking of the glass. To reduce the pressure in the space between the panes, a special valve is placed in the spacer frame of insulating glass units intended for use in areas above 650 m above sea level. This valve allows for maintaining a specific pressure value and protects against excessive pressure buildup.

Therefore, when placing orders for windows that will be used at altitudes > 650 m above sea level, it is advisable to include clear information about this.

SkyVER roller blinds are a functional and aesthetically pleasing solution for your **SUPRO** and **SKYLIGHT** windows.

Perfectly suited for your roof windows. They are available in both sunshade and blackout versions, guaranteeing protection against excessive heat build-up and a peaceful night's sleep in a darkened room.

Available in a wide range of colours and designs - please visit: www.skyfens.pl/en

- **Cassette system** made of aluminium with aluminium guides
- **Shutters intended for high-pitched roof windows** mounted on the roof sash
- **The spring mechanism** easily allows you to set any position of the roller shutter and allows the fabric to be automatically rolled up into the cassette
- **Invasive installation:** screws

SKYVER INTERIOR ROLLER BLINDS AND PLEATS

Aluminium external shutters, folding and straight fitting for **SUPRO** and **SKYLIGHT** roof windows

The **SkyROLL roller shutter** is the perfect solution designed specifically for those seeking effective protection against light, noise, excessive sunlight and high temperatures in loft spaces. Our roller shutter combines functionality, durability and aesthetics, while providing convenient and easy control.

Key features of SkyROLL roller shutters:

- **Protection from light and temperature:** Our external roller shutter effectively blocks excessive sunlight.
- **Protection against noise:** The robust construction of the roller shutter contributes to a significant reduction in external noise.
- **Privacy:** The external roller shutter for SkyROLL roof windows provides an additional layer of privacy for the occupants of the attic rooms.
- **Durability and weather resistance:** The SkyROLL external roller shutter is made of high-quality aluminium, which guarantees its durability and resistance to weather conditions such as rain, wind and UV rays.
- **Convenient control:** our external roller shutter for roof windows is equipped with a convenient control system, which allows you to easily adjust its position and light inside the room. It can be controlled via a wall button or remote control,
- **Power supply:** Our external roller shutter for roof windows offers two convenient power options - electricity or solar energy.
- **Aesthetic design:** Our external roller shutter has been designed with aesthetics in mind and fits harmoniously with the window. It is available in two colour versions: anthracite and bronze.

SKYROLL EXTERNAL SHUTTER

Standard armour colours:

External awnings to match **SUPRO** and **SKYLIGHT** roof windows

The **SkyMAR** awning the perfect complement to **SUPRO** and **SKYLIGHT** windows. It provides optimal shading and protection all year round.

In summer it protects against overheating, in winter it prevents heat loss. It dampens rain noise and acts as a weather screen, further increasing thermal insulation.

In addition, the **SkyMAR** external awning provides adequate privacy in your attic.

Key features of SkyMAR awnings:

- **manual control**
- **control rod option** (control rod at extra cost as per price list)
- **construction colour** AL: RAL 8019, 7043 (brown, anthracite)
- **top profile:** AL folded,
- **bottom profile:** AL extruded, diameter 8 mm
- AL winding roller, diameter 22 mm
- minimum width - **400 mm**, maximum width - **1200 mm**
- minimum height - **500 mm**, maximum height - **1600 mm**
- maximum surface area 1.9 m²
- there is always extra material on the winding roll, approximately + 20 cm in relation to the ordered height
